## EXPERIENCE

### **Dell Technologies, Bengaluru, India** - *Software Developer, Full-time*

July 2020 - PRESENT

- Full Stack developer, actively working on technologies: Angular, HTML, CSS, Javascript, Python, NodeJs and Dotnet C#
- Reduced turnaround time to troubleshoot applications by implementing analytical dashboard
- Increased customer satisfaction by analyzing customer inputs to enhance UI/UX
- Contributed as a fullstack developer in additional projects such as hackathon portals, Covid resource web app, and recreational activities portal

### **Dell Technologies, Bengaluru, India** - *Software Developer, Internship*

Jan 2020 - June 2020

- Comprehensive analysis of the driver recommendations system and gathering data by implementing an analytical dashboard
- Developed word cloud generator using NLP to analyze customer comments to increase CSAT

### **Dell Technologies, Hyderabad, India** - *Software Developer, Internship*

June 2019 - July 2019

- Reduced service requests load by developing a chatbot using RASA ( python NLP framework ) that could understand customers' message context leading them either to a suitable knowledge based article or to raise a request for in person help

---

## EDUCATION

### **Manipal University Jaipur, India -** *Bachelor's in Technology*

August 2016 - May 2020

Majored in Information Technology, with important subjects including data structures and algorithms, software engineering, data mining and warehousing, advanced machine learning and computer networking.

## INTERNATIONAL EXPOSURE

### **Japanese Language Exchange Program** *- JENESYS 2.0*

May 2013

A fully sponsored program by the Japanese government. This helped me understand a different culture and practices, equipping me with a global perspective at an early age to view different expressions from a broader dimension

## HOBBIES / INTERESTS

If I were not a developer I would be a musician. I was a drummer in a rock band in my University. Produced some EDM on FL studio, out on Youtube. Used to beatbox in School days, still goes with me.

Coding is one thing that is both technical and personal interests.

Meditation, yoga and working out also tend to have a place in my schedule.

Sometimes I spend time learning languages. Currently learning Japanese.

## SKILLS

- Agile development practices, Scrum practices
- Comfortable with softwares like TFS and Jira, for managing projects or software life cycle
- FullStack developer including - HTML, CSS, Javascript, JQuery, Nodejs, Angular2, mongodb, SQL, python, flask
- Comfortable working with ASP.NET C# MVC framework.
- ML/DL libraries - numpy, pandas, sklearn, keras and tensorflow
- ElasticSearch - Kibana and Splunk

## LANGUAGES

**English** - Working proficiency

**Hindi** - Native Language

**Japanese** - Limited working proficiency
